## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claims 9 and 10, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(B) as being anticipated by DE 199 61 349 A1 (further referred to as DE 199).

See the attached marked up copy of DE 199 figures 3a-3c depicting the claimed features.

RE claim 5, see Fig. 4a of DE 199.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3651

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over DE 199 over PCT/NL98/00291.

DE 199 teaches the claimed invention as outlined above, however DE 199 fails to teach an extendible conveyor device (28). PCT/NL teaches an extendible conveyor (14). It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize an extendible conveyor as taught by PCT/NL on the conveyor device of DE 199 in order to provide a greater degree of flexibility.

6. Claims 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 199 in view of Doster USP 5,718,325.

DE 199 does not explicitly teach his device having rotatable frames with respect to a base or the exact handle or device which operates the device. Doster teaches the use of a base on wheels 5 with separate sections 18 being rotatable with respect to the base 5. Doster also teaches a handle 12 connected to means for operating the device. It would have been an obvious matter of design choice to provide rotatable sections as taught by Doster on the device of DE 199 and to provide some sort of handle as taught by Doster in order to both provide more flexibility with manipulation of articles and a handle to aid in the ease of the operation of the system.

Art Unit: 3651

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over DE 199 in view of McWilliams.

DE 199 teaches just one device for manipulating articles specific to his device.

McWilliams teaches another device just as claimed by claim 10. It would have been an obvious matter of design choice as to how many known devices can be used to convey articles and the mere thought of connecting a series of known devices to convey articles does not provide a patentable departure over the combined device of DE 199 and McWilliams used together in series.

*Allowable Subject Matter*

8. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A. Hess whose telephone number is 571-272-6915. The examiner can normally be reached on M-Thurs 5:30 - 4:00.
